Keynote

The All New 2010 Intel® Core™ vPro™ Processor Family:
Intelligence is Freedom

Special Guests

Microsoft*, Symantec*

This is the online event business owners, IT pros and PC users have been waiting for, a chance to learn more about the all new 2010 Intel® Core™ vPro™ processor family... and discover for yourself why this is the ideal time to upgrade your PC fleet with systems that have intelligent performance, smart security, and cost-saving manageability built in.

- Learn how intelligent processors can adapt to end users' needs
- See how smart security is built into the DNA of the new processor family
- Find out how new cost-saving manageability can maximize IT productivity

Please accept our personal invitation to attend this virtual event, including an on-demand 20-minute keynote presentation by Intel's Rick Echevarria with special guest appearances by Microsoft* and Symantec*.

Whether you're a small business owner or IT pro, you'll also enjoy access to a full range of online exhibits and virtual experiences including demonstrations, technical content, and exhibits featuring Intel partners.

If you cannot join us today, you can register any time and return at your convenience. Feel free to refer a colleague who may also want to attend. This event will be available online through the end of April 2010. We hope to see you at our virtual event.
